

## E MAJOR SCALE

This is an E Major scale. Learn each CIRCLED position by playing along to a practice loop / jam track from [www.jammingloops.com](http://www.jammingloops.com). Take it slowly to start with, learning each position one at a time. When you feel ready, start playing in different orders and patterns, and before you know it, you'll be improvising solos. There is space left on the diagram for you to add in the rest of the scale when you feel ready.
